Vrtané a drážkované brzdové kotouče vyrobeny z kvalitní slitiny, vhodné pro sportovní jízdu v běžném provozu a tuning. Pro nejlepší brzdny účinek doporučujeme použít OMP kotouče s kombinací OMP Road & Sport sportovních brzdových destiček. ISO certifikovaný výrobní proces zaručuje nevyšší kvalitu kotoučů. Kotouče jsou rozměrově shodné s originální sseriovými kotouči a montáž nevyžaduje absolutně žádné úpravy. Kotouče mají 4 tangenciální drážky a 16 děr, ty jsou navrženy pro snížení hmotnosti kotouče, snížení a odvod "tlaku plynu" který se uvolňuje při brždění (způsobuje vadnutí brzd) a ke zlepšení rozptylu tepla. Při jízdě na mokřém povrchu pomáhají také k odvodu vody z kotoučů. Tangenciální drážky jsou navrženy tak, aby byl koeficient tření stabilní.

**Pro identifikaci kotoučů můžete použít také tento katalog: <http://www.ompracings.it/engine.php3>**
